

AC Overhead Ionizing Blower

Overhead Protection

The BFN 802, 2 fan overhead ionizing blower, with AC technology, provides excellent balance and stability for secure workstation protection. This superior ionizer is equipped with high efficiency LED task lighting, integrated emitter cleaners and safe, easy maintenance access.

Small Footprint, Perfect for Local Coverage

BFN series AC ionizers from Antiestática de México create a dense and well -balanced ionization current. They are unique in their ability to deliver fast decay times with low offset voltages. Continuous balance and decay protection is assured by the reliable, stable AC design. An integrated emitter point cleaner, removable front and rear fan guards, safety switch combine to make the BFN 802 an effective, user friendly ionizer.

Model BFN 802 AC Overhead Ionizer

BFN Ionizers are equipped with LED technology for long -lasting, energy efficient operator lighting

Features

- AC ionization output
- LED Task Light
- Integrated emitter cleaning device
- Variable fan speed control
- Removable finger guards with auto shut -off sensor

Benefits

- ± 10 volt balance; Assured stability over time
- Enhances operator efficiency
- Keeps emitters free from contamination
- Adjustable for varied work applications
- Easy to clean internally and safe to access

Removable fan guard with safety switch and point cleaner.

6 months warranty for manufacturing defect
